

EDUCATION

University of Toledo | B.S. Data Science, Minor in CSE | GPA: 3.82 | Dean's List (Fall 2025)

Relevant Coursework:

CS50 (Harvard): Introduction to Programming with Python, Introduction to Databases with SQL (*In Progress*)

Kaggle: Intro to ML, Intermediate ML, Feature Engineering, Data Visualization, Pandas

University Coursework: Calculus I, Calculus II, CSET-I, Introduction to Statistics

TECHNICAL SKILLS

- **Programming & Data:** Python, SQL (CS50SQL – In Progress), Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Plotly, Seaborn
- **Tools & Platforms:** Git/GitHub, Jupyter Notebook, Claude, Cursor

PROJECTS

Snaibcell | Python, XGBoost, Streamlit, Sklearn

- Engineered 28 domain-derived features from raw stroke imaging and hemodynamic data (penumbra salvageable ratio, cerebral oxygen reserve, hemorrhagic risk, clot burden, brain deterioration rate)
- Trained XGBoost bad-outcome classifier on 3,000 patient records using mutual information feature selection, stratified split, and class imbalance correction via `scale_pos_weight`
- Integrated Featherless-hosted OpenBioLLM-70B for real-time AI emergency triage — natural language patient descriptions automatically mapped to full pre-operative clinical profiles

Neural Network from Scratch | Python, NumPy | — In Progress

- Implemented single neurons, dense layers, and batch processing from scratch
- Implementing forward propagation, ReLU activation, Softmax function, and dense layers from scratch
- Building fully connected neural network from scratch, including dense layers and batch processing

Instagram User Analytics Dashboard

- Processed 1.2M-row Kaggle dataset, sampling 50K users for fast and accurate analysis.
- Built 8+ interactive visualizations for demographics, engagement, and content trends.
- Analyzed gender, country, relationships, and activity metrics (sessions, reels, stories, likes, DMs).

EXPERIENCE

IT Lab Assistant — University of Toledo

Dec 2025 – Present

- Provided technical support resolving hardware and software issues for 5–10 users daily
- Maintained system uptime and managed IT inventory and infrastructure
- Assisted students and faculty with software troubleshooting and system optimization

VIRTUAL PROGRAM

Amazon Operational Strategy & People Analytics Externship | Remote (extern.com)

Jan 2026

- Analyzed employee sentiment data from public sources (Glassdoor, surveys, YouTube comments) to identify workforce attrition risk factors
- Cleaned and structured text data using Python/pandas
- Produced written analytical report summarizing attrition drivers and recommending retention strategies

JPMorgan Chase & Co. — Quantitative Research Virtual Experience | Remote (Forage)

February 2026

- Completed a simulation analyzing financial loan data to estimate probability of default and model borrower risk.
- Categorized FICO scores to create actionable risk profiles for simulated customers.
- Applied Python-based data handling and basic statistical analysis to interpret trends and patterns.

INVOLVEMENT | Runner-up, USCF U1000 Canton Chess Tournament | Outstanding People's Choice Award, Fall 2025
Showcase | AI/ML Club Member | UToledo Data Club Member
